REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant claims are teach a novel polyaphron gel that is converted irreversibly to a liquid state once blinked out from the conjunctival sac. The prior art presents similar polymeric composition but they have no ophthalmic utility (Riess) and do not irreversibly become liquid (Reiss nor Meadows). Though Reiss discloses an aqueous gel-like formulation comprising a surfactant, water and a fluorinated carbon, the compound is too viscous for ophthalmic use and does not shear into a liquid like the polyaphron gel of the instant claims. The prior art is silent to the refraction index as well, which is critical to the functionality of the polyaphron gel of the instant claims. The prior art an eye treatment comprising depositing said polyaphron gel in the conjunctival sac creating a gel reservoir replacing protective tears. For these reasons the claims are novel and non-obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
